Metal Progress

MATERIALS SELECTION • FABRICATION • PROCESS ENGINEERING

SUBJECT INDEX

January-June 1974 Vol. 105, No. 1-6

Aircraft
Advances in Aerospace Materials-Processing Technology 3-41

Aerospace
Advances in Aerospace Materials-Processing Technology 3-41

Aluminum alloys
Advances in Aerospace Materials-Processing Technology 3-44
Alloy 5083-O Used Widely in Cryogenic Applications, by Ray M. Hart 4-41
Extruded Bumpers Score With Chevy, by Scott Hoover 6-45
Heat Treating Wrought Alloys.... 5-69
Rapid Way to Determine Aluminum Grain Size, by Moy Ryvola 6-80
Technology Forecast 1-41
White Engineers Cite Truck Tractor Trends 2-50

Arc welding
Parameters for Arc Welding High-Alloy Castings (Datasheet) 4-63

Automotive parts
Extruded Bumpers Score With Chevy, by Scott Hoover 6-45

Brasses
Complex Yellow Brass Resists Dezincification 2-48

Carbides
Composite Carbide Surfaces Make Castings Wear Better, by Pesho S. Kotval 6-65
Titanium Carbide Coatings Boost Tool Life, by John G. Sauer.... 4-80

Carbide tools
Hardening Steel-Bonded Carbides, by Stuart E. Tarkan and M. Kumar Mal 5-99
Titanium Carbide Coatings Boost Tool Life, by John G. Sauer.... 4-80

Casting
Advances in Aerospace Materials-Processing Technology 3-72
Bainitic Ductile Irons Offer Higher Strength 4-86
Composite Carbide Surfaces Make Castings Wear Better, by Pesho S. Kotval 6-65
Fabricating High-Alloy Castings, by E. A. Schoefer 4-51
Parameters for Arc Welding High-Alloy Castings, (Datasheet) 4-63
Processing Cast Wheels for Railway Cars, by Louis Sandor and John D. Popovich 6-84
Status Report on Ferrous Die Casting 2-73
Technology Forecast 1-57

Cathodic protection
Cathodic System Solves Industrial Industrial Problems, by P. B. Byrne and A. F. Kaelber 3-103

Cleaning
Advances in Aerospace Materials-Processing Technology 3-63
External Forces Mold Process Selection Decisions 6-71
Oils and Grease in Baths Removed via Ultrafiltration 6-99
Process Strips Aluminide Coatings Quickly, by Alfonso L. Baldi 2-63
Ultrasonics vs Degreasing in Processing Die Castings 5-115

Coating
Coil-Coated Products Protect Auto Bodies, by William F. McDermott 6-57
Process Strips Aluminide Coatings Quickly, by Alfonso L. Baldi 2-63
Selection Guide to Coil-Coated Finishes (Datasheet) 6-76
Titanium Carbide Coatings Boost Tool Life, by John G. Sauer.... 4-80

Composites
Advances in Aerospace Materials-Processing Technology 3-57
Technology Forecast 1-52

Cooling curves
Cooling Transformation Diagram for AISI S5 (Datasheet) 1-84
How Manganese and Boron Affect Medium-Carbon Steels, by L. Richard Woodyatt and Charles A. Apple (Datasheet) 5-83

Copper alloys
Advances in Aerospace Materials-Processing Technology 3-53
Complex Yellow Brass Resists Dezincification 2-48
Copper Plated Mandrel Extends Bulb Filament Life 6-51
Heat Treating Copper and Copper Alloys, by Mary W. Covington.. 5-75
Nondirectional Alloys Hike Metal Efficiency, by S. Paul Zarlingo 4-46
Technology Forecast 1-42

Corrosion
Cathodic System Solves Industrial Problems, by P. B. Byrne and A. F. Kaelber 3-103

Cryogenics
Alloy 5083-0 Used Widely in Cryogenic Applications, by Ray M. Hart 4-41

Die casting
Status Report on Ferrous Die Casting 2-73

Dies
Wear Resistance and Impact Strength Key Factors in Selecting Dies 2-67

Ecology
Advance in Aerospace Materials-Processing 3-74
The Four-Way Crunch on Heat Treaters 5-57
How to Use Quenchants Within OSHA Regulations 5-107
Meeting the Energy Crisis 1-87
Oils and Grease in Baths Removed via Ultrafiltration 6-99

Editorial
Aerospace and Nuclear Progress Hinges on Metallurgy and Fabrication, by Allen G. Gray 3-37
Growing Importance of Pressure Vessel Technology, by Allen G. Gray 2-33
The Other Side to Today's Problems in Heat Treating, by Allen G. Gray 5-55
Never So Many New Problems, by Allen G. Gray 1-35
New Materials Responsibilities, by Allen G. Gray 4-37
Pollution Control Standards . . . Who Should Develop Them?, by Allen G. Gray 6-39

Electrical steels
Annealing Improves Electrical Properties of Silicon Steel, by Harry T. Denner 4-73

Energy
Meeting the Energy Crisis 1-87

Finishing
Advances in Aerospace Materials-Processing Technology 3-63
Coil-Coated Products Protect Auto Bodies, by William F. McDermott 6-57
Composite Carbide Surfaces Make Castings Wear Better, by Pesho S. Kotval 6-65
External Forces Mold Process Selection Decisions 6-71
Nickel-Iron Alloy Plate Cuts Nickel Consumption, by Richard J. Clauss and Robert A. Tremmel 6-61
Selection Guide to Coil-Coated Finishes (Datasheet) 6-76
Stainless Steel Surfaces Applied to Carbon Grades 6-67
Titanium Carbide Coatings Boost Tool Life, by John G. Sauer.... 4-80
Technology Forecast 1-58

Forming
Advances in Aerospace Materials-Processing Technology 3-71
Calculating Bend Factors for Steel Plates, by John D. Grozier 4-84
New Pressure Vessel Technology. 2-44
Selecting Alloys for Photochemical Machining, by Richard Langhoff 6-93
Technology Forecast 1-64

Furnaces
Heat Recuperators Cut Furnace Gas Consumption, by Paul K. Shefsiek 5-65
Vacuum Furnace Hardens Cast Stainless Steel Propellors 5-97
Walking-Beam Furnace Processes Thousands of Track Shoes Daily, by Clarence L. Fralick 2-64

Heat-resistant alloys
Technology Forecast 1-46

Heat treatment
Advances in Aerospace Materials-Processing Technology 3-61
Annealing Improves Electrical Properties of Silicon Steel, by Harry T. Denner 4-73
A Better Way to Evaluate Quenchants, by Terry W. Mohr 5-85
The Four-Way Crunch on Heat Treaters 5-57
Hardening Steel-Bonded Carbides, by Stuart E. Tarkan and M. Kumar Mal 5-99
Heat Recuperators Cut Furnace Gas Consumption, by Paul K. Shefsiek 5-65
Heat Treating Copper and Copper Alloys, by Mary W. Covington.. 5-75
Heat Treating Large Structures, by Robert W. Deutsch 5-88
Heat Treating Wrought Alloys 5-69
Spiral Furnace Saves Floor Space 6-89
Technology Forecast 1-54
Vacuum Furnace Hardens Cast Stainless Steel Propellers 5-97
Walking-Beam Furnace Processes Thousands of Track Shoes Daily, by Clarence L. Fralick 2-64

High-alloy steel castings
Fabricating High-Alloy Castings, by E. A. Schoefer 4-51
Parameters for Arc Welding High-Alloy Castings (Datasheet) 4-63

High-strength steels
New Pipeline Steel for Low Temperature Uses, by John L. Mihelich and J. H. Smith 4-39
Typical Compositions, Characteristics, and Uses of Representative Ultrahigh-Strength Steels (Datasheet) 3-77

Inspection
Advances in Nuclear Technology 3-96
Technology Forecast 1-74

Joining
Advances in Aerospace Materials-Processing Technology 3-65
Technology Forecast 1-69

Lead
Technology Forecast 1-42

Machining
Selecting Alloys for Photochemical Machining, by Richard Langhoff 6-93

Magnesium alloys
Technology Forecast 1-41

Maraging steels
Processing the Maraging Steels, by Richard C. Hall 6-41

Materials selection
Advances in Nuclear Technology 3-79

Metallography
Metallographics Exhibit:
Gillette Scientists Look Sharp—Win Jacquet-Lucas Award 1-98
A Portable Field Laboratory for Field Metallography, by Hugh Crowder 4-76
Rapid Way to Determine Aluminum Grain Size, by Moy Ryvola 6-80

Nickel alloys
Advances in Aerospace Materials-

Information Retrieval Service

Computer Search the World Literature on Your Metallurgical Problem

Retrospective Searches—1966 to date

☐ **Over 200,000 articles, books, papers**

Current Awareness Searches—12 monthly searches

☐ **30,000 articles per year added**

1,200 journals searched/Photocopy Service

Programmed to your specifications

Tell us your problem—a printout will be in your hands in less than 10 days.

METALS INFORMATION
American Society for Metals
Metals Park, Ohio 44073
216: 338-5151, Ext. 93

Processing Technology 3-41
Nickel-Iron Alloy Plate Cuts Nickel Consumption, by Richard J. Clauss and Robert A. Tremmel 6-61

Nodular iron

Bainitic Ductile Irons Offer Higher Strength 4-86

Nuclear reactors

Advances in Nuclear Technology 3-79

Photochemical machining

Selecting Alloys for Photochemical Machining, by Richard Langhoff 6-93

Plastics

Advances in Aerospace Materials-Processing Technology 3-57
Mat, Chopped Glass Preforms Rated Higher Than SMC 6-54
Switch From Brass Part Prunes Costs by 25% 4-48
Technology Forecast 1-51

Powder metallurgy

Advances in Aerospace Materials-Processing Technology 3-74
Producing Extra-High Density Parts With Cold-Re-Pressing Techniques, by Carl J. Landgraf 6-95
Technology Forecast 1-76
Thermal-Mechanical Processing Improves Properties of Dense Steel Powder Preforms, by Kenneth H. Moyer 5-105
The Trend: Denser, Larger Parts.. 4-29
Wear Resistance and Impact Strength Key Factors in Selecting Dies 2-67

Pressure vessels

New Pressure Vessel Technology. 2-35

Quenching media

A Better Way to Evaluate Quenchants, by Terry W. Mohr 5-85
How to Use Quenchants Within OSHA Regulations 5-107

Safety

Advances in Aerospace Materials-Processing Technology 3-74
Environmental Regulations Intended to be Guidelines 4-96
The Four-Way Crunch on Heat Treaters 5-57
Meeting the Energy Crisis 1-87
OSHA Studies Heat Exposure 2-70

Silicon steels

Annealing Improves Electrical Properties of Silicon Steel, by Harry T. Denner 4-73

Stainless steels

Stainless Steel Surfaces Applied to Carbon Grades 6-67
Status Report on Ferrous Die Casting 2-73

Steels

Advances in Aerospace Materials-Processing Technology 3-41
Annealing Improves Electrical Properties of Silicon Steel, by Harry T. Denner 4-73
Calculating Bend Factors for Steel Plates, by John D. Grozier 4-84
How Manganese and Boron Affect Medium-Carbon Steels, by L. Richard Woodyatt and Charles A. Apple (Datasheet) 5-83
New Pipeline Steel for Low Temperature Uses, by John L. Mihelich and J. H. Smith 4-39
New Pressure Vessel Technology. 2-35
Processing the Maraging Steels, by Richard C. Hall 6-41
Technology Forecast 1-37
Thermal-Mechanical Processing Improves Properties of Dense Steel Powder Preforms, by Kenneth H. Moyer 5-105
Typical Compositions, Characteristics, and Uses of Representative Ultrahigh-Strength Steels (Datasheet) 3-77

Surveys

External Forces Mold Process Selection Decisions 6-71
Fabricators Pinpoint Problem Areas 4-67
The Four-Way Crunch on Heat Treaters 5-57

Technology Forecast

Technology Forecast '74 1-36

Testing

Advances in Aerospace Materials-Processing Technology 3-61
Advances in Nuclear Technology 3-96
A Better Way to Evaluate Quenchants, by Terry W. Mohr 5-85
New Pressure Vessel Technology. 2-42
A Portable Laboratory for Field Metallography, by Hugh Crowder 4-76
Rapid Way to Determine Aluminum Grain Size, by Moy Ryvola 6-80
Spark Characteristics of Typical Tool Steels 2-60
Technology Forecast 1-74

Titanium

Advances in Aerospace Materials-Processing Technology 3-53
Technology Forecast 1-41

Titanium carbide

Titanium Carbide Coatings Boost Tool Life, by John G. Sauer.... 4-80

Tool steels

Spark Characteristics of Typical Tool Steels (Datasheet) 2-60
Titanium Carbide Coatings Boost Tool Life, by John G. Sauer.... 4-80
Wear Resistance and Impact Strength Key Factors in Selecting Dies 2-67

Trucks

Trucking Industry Usage Shifts Into High Gear, by Edmund L. Melgun and Nicholas Rini..... 2-57
White Engineers Cite Truck Tractor Trends 2-50

Ultrasonic degreasing

Ultrasonics vs Degreasing in Processing Die Castings 5-115

Vapor degreasing

Ultrasonics vs Degreasing in Processing Die Castings 5-115

Walking-beam furnaces

Walking-Beam Furnace Processes Thousands of Track Shoes Daily, by Clarence L. Fralick 2-64

Welding

Advances in Aerospace Materials-Processing Technology 3-65
Advances in Nuclear Technology. 3-90
Engineers Sound Need for Uniform Standards 6-91
Fabricating High-Alloy Castings, by E. A. Schoefer 4-51
Fabricators Pinpoint Problem Areas 4-67
Heat Treating Large Structures, by Robert W. Deutsch 5-88
New Pressure Vessel Technology 2-44
Parameters for Arc Welding High-Alloy Castings (Datasheet) 4-63
Technology Forecast 1-69

Zinc

Technology Forecast 1-42

Metal Progress

Mid-June-December 1974 Vol. 106, No. 1-7

SUBJECT INDEX

Abrasive wheels
Guide to Abrasive Belts, by J. Karl McLaughlin 1-222

Alloy steels
Composition-Size Guide for Steel Selection 1-32
Development of Optimum Properties in Heat-Treatable Steels 1-179
The EX Steels and Equivalent Standard Grades 1-36
Gear Steel Selection: Hardness Criteria, by Roy F. Kern 1-77
Guide to Gear Steels and Gearmaking Processes 1-13
How to Contend With a Shortage Economy . . . Guidelines for Steel Users 4-38
Multiplying Factors for Predicting Hardenability of Carburizing Steels 1-171
Properties of Alloys for Low-Temperature and Cryogenic Service, by Fred R. Schwartzberg 1-129
Properties and Applications of Carbon and Low-Alloy Steel Castings. 1-40
Properties and Applications of Corrosion Resistant Stainless and High Alloy Steel Castings 1-58
Properties and Applications of Heat Resistant Stainless and High Alloy Steel Castings 1-60
Recommended Temperatures and Time Cycles for Annealing Alloy Steels 1-167
SAE Alloy Steel Compositions 1-26
Selecting Arc Welding Electrodes for Mild and Low-Alloy Steels 6-62
Selection and Heat Treatments of Ferrous Alloys for Automotive Components 1-7
Selection of Spring Materials 1-89
Typical Annealing Cycles for Cold Forging Properties 1-180
Typical Mechanical Properties of Selected Carbon and Alloy Steels ... 1-43

Aluminizing
Aluminized Alloy Boosts Turbine Blade Life, by Michael A. Gedwill and Salvator J. Grisaffe 3-66

Aluminum and aluminum alloys
Alloys and Processes That Improve User Utilization 2-53
Analyzing Failures in Pistons of Racing Car Engines, by E. George Kendall and Russell G. Sherman.. 2-77
Compositions, Characteristics, Properties, and Typical Applications of Aluminum Sand and Permanent Mold Casting Alloys 2-64
Compositions and Properties of Die Casting Alloys 1-103
Evaluating Crimped Aluminum Connections, by Kou Chi Lin and Paul Voytik 7-64
Guide for Selecting Filler Alloys for Nonheat-Treatable Aluminum Alloys 1-240
Heat Treatments for Wrought Aluminum Alloys 1-177
Machining Al-Si Alloys With Sintered Diamond Tools, by David Morris ... 6-64
Properties of Alloys for Low-Temperature and Cryogenic Service, by Fred R. Schwartzberg 1-129
Properties and Applications of Nonferrous Powder Metal Parts 1-93
Properties and Applications of Wrought Aluminum Alloys 1-97
Properties, Characteristics, and Applications of Heat-Treatable Aluminum Alloys 1-100
Selecting Aluminum Alloys for Anodizing 1-98
Short and Long-Term Outlook for Availability 4-79
Temper Designations for Aluminum Alloys 1-102
Tough Alloy Wins Terminal Application 3-62
Typical Phases in Aluminum Alloy Systems 1-206

Aluminum oxide
Thermal, Mechanical, and Electrical Properties of Typical High-Alumina Ceramics 1-135

Annealing
Recommended Temperatures and Time Cycles for Annealing Alloy Steels 1-167
Typical Annealing Cycles for Cold Forging Properties 1-180

Anodizing
Selecting Aluminum Alloys for Anodizing 1-98

Appliances
At Maytag, Quality Is Everybody's Responsibility 6-51

Arc welding
Composition and Mechanical Property Requirements for Covered Stainless Steel Electrodes 1-228
Covered Electrodes Recommended for Welds Between Stainless, Heat Resisting and Carbon Steels and Other Alloys 1-232
Guide to Selecting Mild Steel Covered Electrodes, by Jerome E. Hinkel 1-230
Magnetically Controlled Arc Joins Tubular Components, by Max R. Osborn 6-79
Parameters for Arc Welding High-Alloy Castings 1-233
Selecting Arc Welding Electrodes for Mild and Low-Alloy Steels 6-62
Selecting Carbon Steel Wires for Gas Metal-Arc Welding HSLA Steel 1-236

Atmospheres
Exothermic and Endothermic Furnace Atmospheres 1-173
Types of Furnace Atmospheres 1-165

Austempering
Austempering Improves Retaining Rings, by Bryan J. Waterhouse ... 3-71

Automotive parts
Composition and Property Requirements of Automotive Fasteners Grades 7-59
GM Gears Up to Meet Manufacturing Challenges 6-37
Reinforced Polyesters for Exterior Auto Parts, by Gerald L. McCartha 2-50
Selection and Heat Treatment of Ferrous Alloys for Automotive Components 1-7

Belt grinders
Guide to Abrasive Belts, by J. Karl McLaughlin 1-222

Bending
Tons Pressure per Linear Foot and Die Sizes for Bending Steels of Various Thicknesses 1-250

Brasses
Compositions and Applications of Supplementary Wrought Coppers and Copper Alloys 1-113
Properties and Applications of Cast Coppers and Copper Alloys 1-116
Properties and Applications of Widely Used Wrought Coppers and Copper Alloys 1-104
P/M Brass Lock Parts Cop Top MPIF Honors 3-64

Cadmium plating
Guide for Selecting Minimum Thickness for Quality Coatings 1-216

Carbon steels
AISI-SAE Standard Carbon Steels 1-31
Composition-Size Guide for Steel Selection 1-32
Cooling Transformation Diagrams for AISI 1040, 1541, and 15B41 1-174
Covered Electrodes Recommended for Welds Between Stainless, Heat Resisting and Carbon Steels and Other Alloys 1-232
Development of Optimum Properties in Heat-Treatable Steels 1-179
Expected Minimum Mechanical Properties, Conventional Practice, of Cold-Drawn Carbon Steel Rounds, Squares, and Hexagons 1-38
Gear Steel Selection: Hardness Criteria, by Roy F. Kern 1-77
Guide to Gear Steels and Gearmaking Processes 1-13
Guide to Selecting Mild Steel Covered Electrodes, by Jerome E. Hinkel .. 1-230
How to Contend With a Shortage Economy . . . Guidelines for Steel Users 4-38
Machinability Ratings for Cold-Drawn, Carbon-Steel Bars 1-254
Properties and Applications of Carbon and Low-Alloy Steel Castings 1-40
Selecting Arc Welding Electrodes for Mild and Low-Alloy Steels 6-62
Selection and Heat Treatment of Ferrous Alloys for Automotive Components 1-7
Selection of Spring Materials 1-89
Typical Annealing Cycles for Cold Forging Properties 1-180
Typical Imperfections in Carbon Steel Strip 1-248
Typical Mechanical Properties of Selected Carbon and Alloy Steels 1-43

Carburizing
Determining Carburizing Times and Temperatures 1-169
Multiplying Factors for Predicting Hardenability of Carburizing Steels 1-171

Casting
Ductile Iron for High-Temperature Service, by John E. Bevan 7-89
Electric Bill Drops 8% With Power Demand Control, by Daniel Carroll. 3-74
Nodular Iron Conversions at John Deere, by James Doering and Bob Wilson 2-83
Properties and Applications of Carbon and Low-Alloy Steel Castings. 1-40
Properties, Applications, and Cutting Conditions for Malleable Iron Castings 1-84
Repair Can Add 50% to Life of High-Temperature Parts 4-125
Specifications and Properties of Ductile (Nodular) Iron Castings 1-82
Specifications and Properties of Gray Iron Castings 1-78
Value Analysis Is Key to Meaningful Conversions 6-100

Casting alloys
Compositions, Characteristics, Properties, and Typical Applications of Aluminum Sand and Permanent Mold Casting Alloys 2-64

Ceramics
Thermal, Mechanical, and Electrical Properties of Typical High-Alumina Ceramics 1-135

Guide for Selecting Minimum Thickness for Quality Coatings 1-216

Cleaning
Acid Descaling and Cleaning Techniques for Stainless Steel 1-219

Coatings
Guide for Selecting Minimum Thickness for Quality Coatings 1-216
Selection Guide to Coil-Coated Finishes 1-214

Cobalt alloys
Guide to Selection of Superalloys ... 1-122

Columbium alloys
Composition and Properties of Representative Refractory Metal Alloys 1-139

Constitution diagram
Constitution Diagram for Stainless Steel Weld Metal I—Delong Diagram, by William T. Delong 1-226
Constitution Diagram for Stainless Steel Weld Metal II—Schaeffler Diagram, by Anton L. Schaeffler .. 1-227

Continuous casting

Continuous Cast Grades Benefit Users 7-60

Cooling curves

Cooling Transformation Diagrams for AISI 1040, 1541, and 15B41 1-174

Copper and copper alloys

Compositions and Applications of Supplementary Wrought Coppers and Copper Alloys 1-113
Compositions and Properties of Die Casting Alloys 1-103
P/M Brass Lock Parts Cop Top MPIF Honors 3-64
Properties and Applications of Cast Coppers and Copper Alloys 1-116
Properties and Applications of Nonferrous Powder Metal Parts 1-93
Properties and Applications of Widely Used Wrought Coppers and Copper Alloys 1-104
Selection of Spring Materials 1-89
Short and Long-Term Outlook for Availability, by W. Stuart Lyman .. 4-85
Spinodal Cu-Ni-Sn Alloys are Strong and Superductile, by John T. Plewes 2-46

Cryogenic alloys

Properties of Alloys for Low-Temperature and Cryogenic Service, by Fred R. Schwartzberg 1-129

Defects

Typical Imperfections in Carbon Steel Strip 1-248

Die casting alloys

Composition, Properties, and Applications of Magnesium Alloys 1-96
Compositions and Properties of Die Casting Alloys 1-103

Ecology

Oily Haze and Smoke in Plants Cleared up With Precipitators 2-90
Reinforced Plastic Stacks Fight Corrosion 4-131

Editorial

Learning to Live With Shortages, by Allen G. Gray 4-35
Let's Keep Environmental Goals in Perspective, by Allen G. Gray 2-41
Materials: the Next Crisis? by Allen G. Gray 6-35
Meeting Materials Challenges Head-on, by Allen G. Gray 7-43
Needed: A Liberal Dose of Technology, by Allen G. Gray 5-89
Specialty Metals: A Whole New Ball Game, by Allen G. Gray 3-37

Electric power

Electric Bill Drops 8% With Power Demand Control, by Daniel Carroll. 3-74

Electrocoatings

Cationic Finishes Expand Electrocoat Applications, by Marco Wismer and Joseph F. Bosso 2-71

Electrodeposition

Cationic Finishes Expand Electrocoat Applications, by Marco Wismer and Joseph F. Bosso..... 2-71

Electron beam welding

GM Gears Up to Meet Manufacturing Challenges 6-37

Extrusion

Extruding Large Components, by Dirk Rabenold 3-80

Failure

Analyzing Failures in Pistons of Racing Car Engines, by E. George Kendall and Russell G. Sherman .. 2-77

Fasteners

Composition and Property Requirements of Automotive Fasteners Grades 7-59
Low Embrittlement Plating of Steel Fasteners, by James B. Mohler ... 7-55
A User's Guide to Fastener Reliability, by Francis R. Varrese 7-45

Finishing

Aluminized Alloy Boosts Turbine Blade Life, by Michael A. Gedwill and Salvatore J. Grisaffe 3-66
Cationic Finishes Expand Electrocoat Applications, by Marco Wismer and Joseph F. Bosso 2-71
Low Embrittlement Plating of Steel Fasteners, by James B. Mohler 7-55
Guide for Selecting Minimum Thickness for Quality Coatings 1-216
Mechanical Plating Favored in Quality-Conscious Detroit 6-76
Nonmetallic Lube Slashes Metalforming Costs, by David M. Schmid 3-69
Plasma Spray Coating Reduces Wankel Wear, by Frank N. Longo.. 2-75
Selection Guide to Coil-Coated Finishes 1-214
Where Partsmakers Benefit From Powder Coating, by Robert B. Zimmerli 4-101

Forging

Forging Ranges for Steels and Superalloys 1-247
Forgings for Jet Engines: More Quality at Less Cost, by Elihu F. Bradley and Matthew J. Donachie Jr... 2-80
Forging Temperatures for Tool Steels 1-246

Forming

Cutting with CO_2 Lasers, by David A. Belforte 4-119
Extruding Large Components, by Dirk Rabenold 3-80
Forgings for Jet Engines: More Quality at Less Cost, by Elihu F. Bradley and Matthew J. Donachie Jr. 2-80
How to Boost Production of Sheet Metal Parts, by Walter E. Johnson and Philip A. Stine 7-92
Nonmetallic Lube Slashes Metalforming Costs, by David M. Schmid ... 3-69
Wireforms: Different Route to Lower Material Costs, by Richard L. Taylor 6-92

Free-machining steels

AISI-SAE Standard Carbon Steels ... 1-31
Screw Machining Costs Cut with New Stainless, by Robert L. Caton 6-58

Furnaces

Plasma-Furnace Stainless Solves Corrosion Problem 2-43
Selecting Heat-Resistant Alloys for Application in Furnaces, by Donald E. Wenschhof 2-67

Gears

Gear Steel Selection: Hardness Criteria, by Roy F. Kern 1-77
Guide to Gear Steels and Gearmaking Processes 1-13

Gold

Properties of the Noble Metals 1-130

Gray iron

Specifications and Properties of Gray Iron Castings 1-78

Grinding machine

Guide to Abrasive Belts, by J. Karl McLaughlin 1-222

Hardenability

A Logarithmic System for Hardenability Calculation (Datasheet) 4-98

Heat-resistant alloys

Covered Electrodes Recommended for Welds Between Stainless, Heat Resisting and Carbon Steels and Other Alloys 1-232
Forging Ranges for Steels and Superalloys 1-247
Guide to Selection of Superalloys.... 1-122
Machining Ultrahigh Strength Alloys. 1-256
New Valve Alloy Combats Corrosion, Gear, by Alvin E. Nehrenberg, Edward T. Vitcha, and Wallace M. Matlock 6-67
Properties of Alloys for Low-Temperature and Cryogenic Service, by Fred R. Schwartzberg 1-129
Properties and Applications of Heat Resistant Stainless and High Alloy Steel Castings 1-60
Selecting Heat-Resistant Alloys for Application in Furnaces, by Donald E. Wenschhof 2-67
Selection of Spring Materials 1-89

Heat treatment

Austempering Improves Retaining Rings, by Bryan J. Waterhouse ... 3-71
Avoiding Retained Austenite in Tool Steels, by Dennis D. Huffman 7-79
Cooling Transformation Diagrams for AISI 1040, 1541, and 15B41 1-174
Determining Carburizing Times and Temperatures 1-169
Development of Optimum Properties in Heat-Treatable Steels 1-179
GM Gears Up to Meet Manufacturing Challenges 6-37
Hardenability Bands for Steels:
1038-H to 1541-H 1-151
1330-H to 4047-H 1-153
4118-H to 4161-H 1-154
4320-H to 4718-H 1-155
4720-H to 50B60-H 1-157
5120-H to 51B60-H 1-158
6118-H to 86B30-H 1-159
8637-H to 8742-H 1-161
8822-H to 94B30-H 1-163
1038-H to 1541-H 1-151
1330-H to 4047-H 1-153
4118-H to 4161-H 1-154
4320-H to 4718-H 1-155
4720-H to 50B60-H 1-157
5120-H to 51B60-H 1-158
6118-H to 86B30-H 1-159

Heat Treatments for Wrought Aluminum Alloys 1-177
Induction Heat Treatments for Stainless Steels 1-168
Multiplying Factors for Predicting Hardenability of Carburizing Steels 1-171
Operating Salt Baths Properly, by Edward Taylor 6-84
Properties, Characteristics, and Applications of Heat-Treatable Aluminum Alloys 1-100
Recommended Temperatures and Time Cycles for Annealing Alloy Steels 1-167
Selecting Heat-Resistant Alloys for Application in Furnaces, by Donald E. Wenschhof 2-67
Selection and Heat Treatment of Ferrous Alloys for Automotive Components 1-7
Surface Hardening by Induction, by Harry B. Osborn Jr. 1-181
Temper Designations for Aluminum Alloys 1-102
Types of Furnace Atmospheres 1-165
Typical Annealing Cycles for Cold Forging Properties 1-180
Versatile Quenching Oil Handles Many Steels, by Erhard M. Neumann ... 4-107

High-strength steels

Compositions, Properties, and Producers of High-Strength Steels 1-65
Melting and Refining Specialty Steels at Allegheny Ludlum Industries, by Harry L. Bishop Jr. 3-53
Selecting Carbon Steel Wires for Gas Metal-Arc Welding HSLA Steel 1-236
Standard High-Temperature, High-Temperature, High-Strength Alloys 3-60
Typical Compositions, Characteristics, and Uses of Representative Ultra-high-Strength Steels 1-76

Induction hardening

Surface Hardening by Induction, by Harry B. Osborn Jr. 1-181

Induction heat treatment

Induction Heat Treatments for Stainless Steels 1-168

Iridium

Properties of the Noble Metals 1-130

Iron alloys

Guide to Selection of Superalloys ... 1-122
Metallographic Reagents for Iron and Steel 1-201
Properties and Applications of Ferrous Powder Metal Parts 1-86
Selection and Heat Treatment of Ferrous Alloys for Automotive Components 1-7

Isostatic pressing

Hot Isostatic Compaction Is Key to Quality Titanium Parts, by T. B. Gurganus and G. K. Turnbull 3-83

Joining

'Noiseless' Process Forms Strong Rivet Heads, by Werner Gubelin .. 3-78
A User's Guide to Fastener Reliability, by Francis R. Varrese 7-45

Lubricants

Nonmetallic Lube Slashes Metalforming Costs, by David M. Schmid ... 3-69

Machining

Guide for Machining Standard AISI Stainless Steels in Automatic Equipment, by Deo M. Blott 1-255
Machinability Ratings for Cold-Drawn, Carbon-Steel Bars 1-254

Machining Al-Si Alloys With Sintered Diamond Tools, by David Morris .. 6-64
Machining Ultrahigh Strength Alloys . 1-256

Magnesium alloys

Composition, Properties, and Applications of Magnesium Alloys 1-96
Compositions and Properties of Die Casting Alloys 1-103

Malleable iron

Properties, Applications, and Cutting Conditions for Malleable Iron Castings 1-84
Selection and Heat Treatment of Ferrous Alloys for Automotive Components 1-7

Mechanical plating

Low Embrittlement Plating of Steel Fasteners, by James B. Mohler 7-55
Mechanical Plating Favored in Quality Conscious Detroit 6-76

Metallographic exhibit

Bell Scientists Awarded Jacquet-Lucas Prize 7-37

Metallography

Metallographic Reagents for Iron and Steel 1-201

Metric system

Common Units for Converting From the English to the Metric (SI) System 1-195
English/Metric (SI) Stress Conversion Factors 1-196

Molybdenum alloys

Composition and Properties of Representative Refractory Metal Alloys 1-139

Nickel alloys

Covered Electrodes Recommended for Welds Between Stainless, Heat Resisting and Carbon Steels and Other Alloys 1-232
Forging Ranges for Steels and Superalloys 1-247
Guide to Selection of Superalloys .. 1-122
Selection of Spring Materials 1-89

Nickel plating

Guide for Selecting Minimum Thickness for Quality Coatings 1-216

Nodular iron

Ductile Iron for High-Temperature Service, by John E. Bevan 7-89
Nodular Iron Conversions at John Deere, by James Doering and Bob Wilson 2-83
Selection and Heat Treatment of Ferrous Alloys for Automative Components 1-7
Specifications and Properties of Ductile (Nodular) Iron Castings 1-82

Nondestructive testing

Nondestructive Methods for Rating Materials 1-184
Sharp Focus Improves X-Ray Analysis, by William H .Spaulding 7-86
Spark Characteristics of Typical Tool Steels 1-210

OSHA regulations

Converting Sludge to Solid Simplifies Handling, Dumping 7-
Press Operator Protection for P/M Is Spelled Out 3-91
Two Air Compressors Heat Plant Addition 6-103

Osmium

Properties of the Noble Metals 1-130

Palladium

Properties of the Noble Metals 1-130

Phase diagrams

Iron-Carbon Equilibrium Diagram 1-149

Phosphating

Troubleshooting Checklist for Phosphating Systems 1-221

Plasma arc furnace

Plasma-Furnace Stainless Solves Corrosion Problem 2-43

Plasma arc welding

Titanium Jet Engine Parts Joined With Plasma Arc 2-79

Plasma spraying

Plasma Spray Coating Reduces Wankel Wear, by Frank N. Longo 2-75

Plastics

Glass-Reinforced Foam Parts Serve Structural Functions 3-65
Guidelines for Specifying Thermoplastics, by Borg-Warner Chemicals Technical Services Group 6-72
Mechanical and Physical Properties of Engineering Plastics 1-142
Reinforced Polysters for Exterior Auto Parts, by Gerald L. McCartha 2-50
Short and Long-Term Outlook for Availability, by Ralph L. Harding Jr. 4-87
Using Resist Coatings in Selective Plating, by Norman R. Roobol 7-73

Plating

Using Resist Coatings in Selective Plating, by Norman R. Roobol 7-73

Platinum

Properties of the Noble Metals 1-130

Pollution abatement

Converting Sludge to Solid Simplifies Handling, Dumping 7-95
Oily Haze and Smoke in Plants Cleared up With Precipitators 2-90
Two Air Compressors Heat Plant Addition 6-103

Powder coating

Where Partsmakers Benefit From Powder Coating, by Robert B. Zimmerli 4-101

Powder metallurgy

Costs 35% Less Than Machining From Solid, by Jess F. Helsel 4-123
Hot Isostatic Compaction Is Key to Quality Titanium Parts by T. B. Gurganus and G. K. Turnbull 3-83
New Grade Eliminates Heat Treatment 7-90
Press Operator Protection for P/M Is Spelled Out 3-91
Producing Extra-High Density Parts With Cold Re-pressing Techniques, by Carl J. Landgraf 2-87
Properties and Applications of Ferrous Powder Metal Parts 1-86
Properties and Applications of Nonferrous Powder Metal Parts 1-93
Success of Complex Part Hinges on Material, Process 6-99

Powder metal parts

Hot Isostatic Compaction Is Key to Quality Titanium Parts by T. B. Gurganus and G. K. Turnbull 3-83
P/M Brass Lock Parts Cop Top MPIF Honors 3-64
Producing Extra-High Density Parts With Cold Re-pressing Techniques, by Carl J. Landgraf 2-87
Properties and Applications of Ferrous Powder Metal Parts 1-86
Properties and Applications of Nonferrous Powder Metal Parts 1-93

Precious metals

Properties of the Noble Metals 1-130

Quality control

At Maytag, Quality Is Everybody's Responsibility 6-51

Quenching

Versatile Quenching Oil Handles Many Steels, by Erhard M. Neumann 4-107

Radiography

Automatic Processing Speeds Pipe Weld Radiography 3-73

Refractory metals

Composition and Properties of Representative Refractory Metal Alloys 1-139

Rhodium

Properties of the Noble Metals 1-130

Riveting

'Noiseless' Process Forms Strong Rivet Heads by Werner Gubelin .. 3-78

Ruthenium

Properties of the Noble Metals 1-130

Salt baths

Operating Salt Baths Properly, by Edward Taylor 6-84

Screw machines

Screw Machining Costs Cut with New Stainless, by Robert L. Caton 6-58

Silver

Properties of the Noble Metals 1-130

Specialty metals

How New Speciality Metals Technology Benefits Users 3-39
Melting and Refining Specialty Steels at Allegheny Ludlum Industries, by Harry L. Bishop Jr. 3-53

Springs

Selection of Spring Materials 1-89

Stainless steels

Acid Descaling and Cleaning Techniques for Stainless Steel 1-219
Composition and Mechanical Property Requirements for Covered Stainless Steel Electrodes 1-228
Constitution Diagram for Stainless Steel Weld Metal I—Delong Diagram, by William T. DeLong 1-226
Constitution Diagram for Stainless Steel Weld Metal II—Schaeffler Diagram, by Anton L. Schaeffler 1-227
Covered Electrodes Recommended for Welds Between Stainless, Heat Resisting and Carbon Steels and Other Alloys 1-232
Forging Ranges for Steels and Superalloys 1-247
Guide for Machining Standard AISI Stainless Steels in Automatic Equipment, by Deo M. Blott 1-255
How to Contend With a Shortage Economy . . . Guidelines for Steel Users 4-38
Induction Heat Treatments for Stainless Steels 1-168
Melting and Refining Specialty Steels at Allegheny Ludlum Industries, by Harry L. Bishop Jr. 3-53
Plasma-Furnace Stainless Solves Corrosion Problem 2-43
Properties of Alloys for Low-Temperature and Cryogenic Service by Fred R. Schwartzberg 1-129
Properties and Applications of Corrosion Resistant Stainless and High Alloy Steel Castings 1-58
Properties and Applications of Ferrous Powder Metal Parts 1-86
Properties and Applications of Heat Resistant Stainless and High Alloy Steel Castings 1-60
Properties and Applications of Special Stainless Steels 1-54
Selection of Spring Materials 1-89
Screw Machining Costs Cut with New Stainless b,y Robert L. Caton 6-58
Typical Annealing Cycles for Cold Forging Properties 1-180
Typical Properties of Wrought Stainless Steels 1-46

Steels

AISI-SAE Standard Carbon Steels ... 1-31
Classification and Selection of Tool Steels 1-73
Compositions, Properties, and Producers of High-Strength Steels 1-65
Composition and Property Requirements of Automative Fasteners Grades 7-59
Composition-Size Guide for Steel Selection 1-32
Continuous Cast Grades Benefit Users 7-60
Covered Electrodes Recommended for Welds Between Stainless, Heat Resisting and Carbon Steels and Other Alloys 1-232
Development of Optimum Properties in Heat-Treatable Steels 1-179
Expected Minimum Mechanical Properties, Conventional Practice, of Cold-Drawn Carbon Steel Rounds, Squares, and Hexagons 1-38
